

10% Tariff Surcharge

As I believe everyone is aware, there is a new 10% Tariff being imposed on many items, including office furniture. This went into effect on Monday September 24th. We have already received our first Duty invoice for a container arriving in Oakland tomorrow.

The Tariff will be applied as follows:

A 10% Tariff Surcharge will be applied to all orders received after October 15th. Orders that are received before October 15th for immediate shipment will not have the Tariff applied. Any order received before October 15th and scheduled for future ship after October 15th will be subject to this 10% charge. All orders that are in house as of today, will not have a Tariff applied.

We will be billing our standard pricing for all product with a separate billing line item for the Tariff. This will be first on the Acknowledgement and we will require the dealer to approve the additional charge, if not reflected in their Purchase Order.

All list prices and discounts remain the same.

If the Tariff is dropped we will immediately drop the Surcharge. If the Tariff is increase we will follow the new percentage.

Woodstock thanks you for your business and your understanding during these uncertain times.
